

TUTORIAL 15

Copy the Baby Buggy Folder from the Q Drive to your student drive.

Set up a project file so that inventor can link to that copied folder automatically.

You are provided with completed subassemblies.

View the supplied dwfx file available on the Q drive to view how the buggy is assembled.

Assembly these to create an assembly of the Buggy

Attached the Seat to the Assembly and apply a different colour to the seat.

Save the completed assembly as Tutorial 15.dwfx for handing in.
