

Year 2 – SEM1: Engineering: Tutorial 10

Download the Tutorial 10 Files zip file from the website. Assemble the parts provided to create the Trolley assembly as shown below.

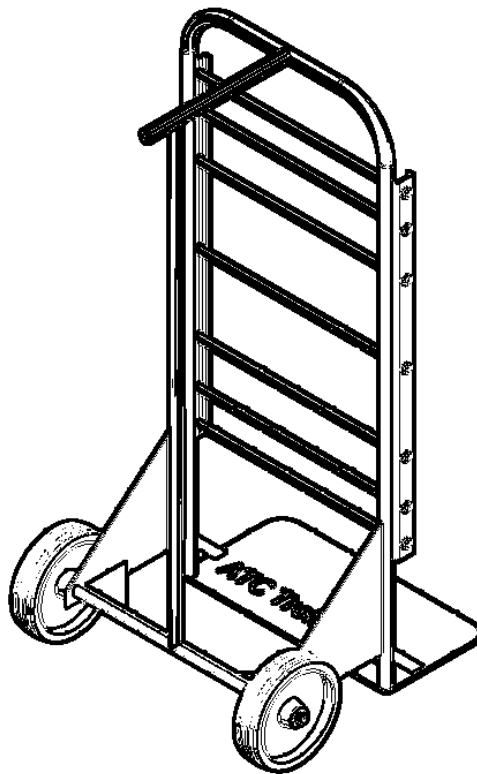

Ensure that the first part inserted in the assembly is placed at the origin and grounded.

A dwfx file is also available

so that you can view how the Trolley is assembled.

(Important: Refer to the video book for the process)

Be careful not to hand in the sample dwfx OR an iam file as you will score 0 marks

VERY IMPORTANT

Save the folder containing the assembly file for future use in Semester 2 together with the part files .

Save the Assembly as Tutorial 10.dwfx for handing in
